DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 52 and 55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 55 is indefinite because it depends from itself. In claim 52, there is insufficient antecedent basis for the limitation "one of the phases."

2. Claim 53 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants' asserted citations of support have been reviewed, but no support for the specific embodiment of new claim 53 can be found.

Claim Rejections - 35 USC § 102

3. Claims 23-28, 31-35, 53 and 54 are rejected under 35 U.S.C. 102(b) as being anticipated by Liu et al. (US 5,508,353) for the reasons set forth in item 3 of the Office action mailed 12/1/2004.

Applicants' amendment does not distinguish over the reference because the claimed copolymer is disclosed in the previously cited examples. Regarding claim 23 and claims dependent thereon, the additional description of the backbone does not

Art Unit: 1713

change the scope of the claimed copolymer, which is directed to a copolymer having a narrow molecular weight backbone and specific grafted segments. The reference polymer has a narrow molecular weight backbone and grafted segments within the claimed scope, and therefore the additional limitations of a precursor compound do not distinguish over the reference examples because there is nothing which would indicate that the final copolymer made in the cited reference examples is outside the scope of the claims. Regarding claim 53, this embodiment is shown in reference examples 11 and 12 which show sequential grafting of two different monomers.

Allowable Subject Matter

4. Claims 1-5, 8-22, 38-46 and 48-51 are allowed.
5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1713

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
